Backend & Data: Node.js, Express.js, Fastify, PHP, WordPress, Prisma, PostgreSQL/SQL, Redis, REST APIs, Zod validation
Cloud & Deployment: AWS EC2, Linux, Nginx reverse proxy, systemd, HTTPS/TLS, Cloudflare DNS, DreamHost, SFTP, Git/GitHub
Testing & Tools: Playwright, Vitest, GitHub Actions, Azure DevOps, Electron IPC, Figma, Google Analytics

EXPERIENCE

SOFTWARE ENGINEER INTERN | Omnia WorkSpace | Nov 2025 – Feb 2026

- Built and maintained an interactive workflow canvas for a desktop application using Electron, React, TypeScript, and React Flow.
- Implemented workspace persistence with Prisma and PostgreSQL, serializing nodes, edges, and viewport state to restore workflows across sessions.
- Shipped a Tasks module across Fastify routes, Prisma models, and React UI; integrated backend APIs with Electron IPC/WebContentsView.
- Debugged complex UI state and coordinate issues; built reusable React/Tailwind/MUI components and maintained Vitest/Playwright tests.
- Collaborated through Azure DevOps on pull requests, rebases, merge conflicts, and CI pipeline fixes.

SALES REPRESENTATIVE | Greg Rogers State Farm, Greenville, SC | Aug 2022 – Present

- Manage customer relationships and records in a regulated environment; communicate complex information clearly and resolve customer issues while balancing competing priorities.

FRONT-END DEVELOPER — CAPSTONE COLLABORATION | LMBK, Greenville, SC | Jan 2021 – Apr 2021

- Collaborated with a multidisciplinary team to develop a Bubble.io web application, contributing to interactive media, UI design, front-end implementation, and usability testing under NDA.

SELECTED PROJECTS

CARBON FOOTPRINT CALCULATOR | WordPress, PHP, JavaScript, Node.js, Express, Zod, AWS EC2

Live site • WordPress theme • Express API

- Built and deployed a custom WordPress theme and calculator plugin that connect a PHP/WordPress form flow to an Express API for footprint calculations.
- Implemented request validation with Zod and calculation logic in Node.js; deployed the API on AWS EC2 behind Nginx, managed it with systemd, and configured DNS plus HTTPS/TLS.

FAN PACK FUNNEL WEB APPLICATION | Next.js, Node.js, Redis, Mailchimp, Stripe • Portfolio

- Built a full-stack subscription funnel with secure session/token handling, Stripe payments, Mailchimp subscription verification, and webhook-driven workflows.
- Cached session and subscriber state in Redis, reducing Mailchimp API requests by approximately 80% and avoiding rate-limit errors.

L4D FORUM WEB APPLICATION | Next.js, TypeScript, Node.js, Express, PostgreSQL • GitHub

- Built and deployed a full-stack forum with authentication, sessions, nested posts/comments/replies, reactions, pagination, and authorization.
- Implemented Server-Sent Events (SSE) for live notifications and designed PostgreSQL relationships for content and notification state.

PRODUCTION SCHEDULER | Next.js, TypeScript, PostgreSQL, Prisma, Zod • GitHub profile

- Developed role-based workflows for scheduling and resource management, with authorization rules and an order log that records administrative actions for review.
