JAIQUEZ HAGOOD

FULL-STACK WEB DEVELOPER

Piedmont, SC | 864-534-6774 | west00brook@gmail.com
Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full-Stack Developer building web applications and Electron desktop apps across **React**, **Next.js**, **Node.js**, **Express**, and **PostgreSQL**. Delivers API integration, authentication and authorization, and deployed features that connect client interfaces with server logic. Also supports WordPress and PHP work, including cloud deployment on AWS EC2 for production sites.

SKILLS

Development	React, Next.js, JavaScript, TypeScript, HTML/CSS, Tailwind CSS, Bootstrap, React Flow, Node.js, Express, Fastify, PHP, WordPress
Data & Tools	PostgreSQL/SQL, Prisma, Redis, REST APIs, Zod, Playwright, Vitest, Git/GitHub, Azure DevOps, GitHub Actions, Zapier, Figma, Adobe Products
Deployment	AWS EC2, Linux, Nginx, systemd, HTTPS/TLS, Cloudflare DNS
Customer & Office	Customer communication, CRM and policy-management systems, accurate recordkeeping, issue troubleshooting, confidentiality, multitasking, escalation and follow-through

EXPERIENCE

SOFTWARE ENGINEER INTERN | Omnia WorkSpace

Nov 2025 – Feb 2026

- Implemented workspace persistence 5 times weekly with Prisma and PostgreSQL, restoring nodes, edges, and viewport state across sessions.
- Collaborated through Azure DevOps on pull requests, rebases, merge conflicts, and CI pipeline fixes.
- Maintained Vitest and Playwright tests to catch regressions across core workflows before release.
- Built reusable React, Tailwind CSS, and MUI components to keep the interface consistent and easier to extend.
- Debugged complex UI state and coordinate issues to improve reliability in the desktop workflow experience.
- Shipped the Tasks module across Fastify routes, Prisma models, and React UI, connecting backend APIs with Electron IPC and WebContentsView.
- Built and maintained interactive workflow canvas updates 5 times weekly for a desktop app using Electron, React, TypeScript, and React Flow.
- Implemented workspace persistence with Prisma and PostgreSQL, restoring nodes, edges, and viewport state across sessions.
- Delivered a Tasks module spanning Fastify routes, Prisma models, and React UI; integrated backend APIs with Electron IPC and WebContentsView.
- Debugged UI state and coordinate issues; built reusable React/Tailwind/MUI components and maintained Vitest/Playwright tests.
- Collaborated through Azure DevOps pull requests, rebases, merge-conflict resolution, and CI pipeline fixes.

FRONT-END DEVELOPER — CAPSTONE COLLABORATION | LMBK, Greenville, SC

Jan 2021 – Apr 2021

- Collaborated with a multidisciplinary team to develop a Bubble.io web application, contributing to interactive media, UI design, front-end implementation, and usability testing under NDA.
- Tested 1 usability session weekly to surface friction points and guide front-end refinements.
- Reviewed 2 interface mockups weekly with the team to align design direction under NDA constraints.
- Collaborated with a multidisciplinary team to translate product requirements into Bubble.io web application features.
- Developed interactive media and UI assets that supported a more cohesive and engaging application experience.
- Implemented front-end functionality in Bubble.io, aligning layouts and interactions with design specifications.
- Documented usability feedback and adjusted interface details to improve clarity and navigation.

SELECTED PROJECTS

CARBON FOOTPRINT | WordPress, PHP, JavaScript, Node.js, Express, AWS EC2

Live site | *Github* | *Github(Express API)*

- Built and deployed a custom WordPress theme and calculator plugin connecting a PHP/WordPress form flow to an Express API. Implemented Zod request validation and Node.js calculation logic; deployed the API on AWS EC2 behind Nginx, managed it with systemd, and configured DNS and HTTPS/TLS.

FAN PACK FUNNEL WEB APPLICATION | Next.js, Node.js, Redis, Mailchimp, Stripe

Live site

- Built a full-stack subscription funnel with secure session/token handling, Stripe payments, Mailchimp subscription verification, and webhook-driven workflows. Used Redis caching to reduce Mailchimp API requests by approximately 80% and avoid rate-limit errors.

L4D FORUM WEB APPLICATION | Next.js, TypeScript, Node.js, Express, PostgreSQL

GitHub | *Live site*

- Built and deployed a full-stack forum with authentication, sessions, nested posts/comments/replies, reactions, pagination, and authorization. Implemented Server-Sent Events for live notifications and designed PostgreSQL relationships for content and notification state.

PRODUCTION SCHEDULER | Next.js, TypeScript, PostgreSQL, Prisma, Zod

GitHub

- Developed role-based scheduling and resource-management workflows with authorization rules and an order log for reviewing administrative actions.

ADDITIONAL EXPERIENCE

Lead Sales Representative | Greg Rogers State Farm, Greenville, SC

Aug 2022 – Present

- Autonomously manage 90% of daily agency operations as the sole in-office point of contact, driving client retention, risk assessment, and policy lifecycle workflows entirely unsupervised.
- Manage the complete sales pipeline, independently generating 5–15 new policies monthly while executing proactive quoting strategies to mitigate corporate policy attrition.
- Maintain integrity and security over sensitive customer databases, handling high-volume payments, policy updates, and complex underwriter discrepancies with absolute accuracy.
- Coordinate directly with corporate technical support and regional leadership to audit data records, resolve systemic network issues, and align branch operations with strict compliance standards.
- Own the administration and optimization of core CRM and policy management networks (including State Farm Policy Center), troubleshooting software errors and serving as the office systems expert.
- Maintain accurate customer profiles, transaction records, and policy information in CRM and policy-management systems.
- Troubleshoot recurring Cisco Jabber issues using established steps and escalate broader system problems to State Farm support.
- Handle sensitive customer information carefully while balancing customer needs, administrative tasks, and company procedures.

DAY CAMP COUNSELOR | Caine Halter Family YMCA, Greenville, SC

May 2016 – Aug 2020

- Handle sensitive customer information carefully while balancing customer needs, administrative tasks, and company procedures.

EDUCATION & TRAINING

B.S., Digital Information Design — Interactive Media | Winthrop University, May 2021

A.A., Design | Greenville Technical College, May 2018

Full-Stack Web Development Training Certification, May 2025 | WordPress Development Fundamentals, In Progress
