

JAIQUEZ HAGOOD

FULL-STACK WEB DEVELOPER

Piedmont, SC • 864-534-6774 • west00brook@gmail.com • [Portfolio](#) • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Full-stack web developer with a B.S. in Digital Information Design and hands-on experience building modern web applications with React, Next.js, TypeScript, Node.js, Express, PostgreSQL, and Redis. Experienced with authentication, API integrations, real-time features, automated testing, and responsive UI development. Brings professional software-development experience from an internship plus deployed, production-minded applications. Seeking a web development role with opportunities to contribute, learn, and grow into greater technical ownership.

EXPERIENCE

SOFTWARE ENGINEER INTERN | 11/2025 – 02/2026

Omnia WorkSpace

- Built and maintained an interactive workflow canvas for a desktop application using Electron, React, TypeScript, and React Flow.
- Implemented workspace persistence with Prisma and PostgreSQL, serializing nodes, edges, and viewport state so workflows restored accurately across sessions.
- Designed and shipped a Tasks module end-to-end across Fastify routes, Prisma models, and React UI, keeping workflow and global task views synchronized.
- Integrated backend APIs with Electron IPC/WebContentsView to support real-time navigation, reload, zoom, and visibility controls for embedded applications.
- Debugged complex React Flow and Electron state, viewport, and coordinate issues, eliminating node offset and flicker bugs.
- Developed reusable React/Tailwind/MUI components and maintained automated tests with Vitest and Playwright.
- Collaborated through Azure DevOps on pull requests, rebases, merge conflicts, and CI pipeline fixes.

SALES REPRESENTATIVE | 08/2022 – Present

Greg Rogers State Farm — Greenville, SC

- Manage customer relationships, accurately maintain records, and resolve complex customer issues in a regulated environment.
- Communicate technical and policy information clearly to customers with different levels of familiarity, strengthening requirements-gathering and problem-solving skills.
- Balance competing priorities while maintaining accuracy, follow-through, and service quality.

FRONT-END DEVELOPER — PRODUCTION DEVELOPMENT INTERNSHIP (CAPSTONE COLLABORATION) | 01/2021 – 04/2021

LMBK — Greenville, SC

- Collaborated with a multidisciplinary team to design and develop a web application using Bubble.io.
- Contributed to interactive media, front-end development, user interface design, and usability testing.
- Worked in a startup-style environment with real-world client expectations, rapid prototyping, and product iteration while adhering to NDA restrictions.

Day Camp Counselor | 05/2016 – 08/2020

Caine Halter Family YMCA — Greenville, SC

- Collaborated with parents and staff to address student behavioral and learning challenges through proactive strategies.
- Developed and refined program schedules to enhance student learning opportunities and meet demand.
- Promoted healthy habits among youth through physical activities, team-building exercises, and devotions.
- Supported diverse student needs by adapting activities, expectations, and communication approaches to individual participants.

PROJECTS

Fan Pack Funnel Web Application | Next.js, Node.js, Redis, Mailchimp, Stripe

[Live Demo](#) | [Portfolio](#)

- Built a full-stack subscription funnel with secure session/token handling, Stripe payments, Mailchimp subscription verification, and webhook-driven workflows.
- Used Redis to cache session and subscriber state, reducing Mailchimp API requests by approximately 80% and avoiding rate-limit errors.
- Designed frontend polling and session-expiration handling to maintain token integrity throughout checkout.

L4D Forum Web Application | Next.js, TypeScript, Node.js, Express, PostgreSQL

[Live Demo](#) | [Portfolio](#)

- Built and deployed a full-stack forum application with authentication, sessions, nested posts/comments/replies, reactions, pagination, and notification workflows.
- Implemented real-time notifications with Server-Sent Events (SSE), allowing users to receive interaction updates without refreshing the page.
- Designed backend routes and PostgreSQL data relationships for forum content and notification state, with validation and authorization.
- Used GitHub pull requests to manage feature development and iterative improvements, treating the application as a real-world deployed product.
- Deployed the full-stack application to AWS, configuring cloud infrastructure and deployment workflows to support a production environment.

Production Scheduler | Next.js, TypeScript, PostgreSQL, Prisma, Zod

[Github](#) | [Portfolio](#)

- Built a full-stack subscription funnel with secure session/token handling, Stripe payments, Mailchimp subscription verification, and webhook-driven workflows.
- Used Redis to cache session and subscriber state, reducing Mailchimp API requests by approximately 80% and avoiding rate-limit errors.
- Designed frontend polling and session-expiration handling to maintain token integrity throughout checkout.

TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, HTML/CSS, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Fastify.js, Prisma, PostgreSQL/SQL, Redis

Platforms & Tools: GitHub Actions, Azure DevOps, WordPress, Webflow, Figma, Electron IPC, Playwright, Vitest, AWS (EC2), CloudFlare(S3)

Other: React Native (Expo), Google Analytics, Zapier

EDUCATION & TRAINING

B.S. Digital Information Design — Interactive Media — Winthrop University (05/2021)

A.A. Design — Greenville Technical College (05/2018)

- Full-Stack Web Development Training Certification — 05/2025
- WordPress Development Fundamentals — In Progress
